Installation using the Adobe Marketplace

Rich Snippet Suite for Magento 2

Installation using the Adobe Marketplace

1 Installing a Magento 2 Extension via the Adobe Marketplace

Installing a Magento 2 Extension via the Adobe Marketplace

Important Note before Installing

If the plugin was purchased from **magmodules.eu**, this installation method **does not apply**. The steps outlined below are **only for orders placed via the Adobe Marketplace**. Additionally, this is the **only supported installation method for Marketplace purchases** other installation methods mentioned in our support section do **not** apply to Marketplace orders.

1. Get Access Keys from Magento Marketplace

1. Go to Magento Marketplace.
2. Log in with your Magento account.
3. Click on your profile (top-right) → **My Profile**.
4. Navigate to **Access Keys** (under the Marketplace tab).
5. If you don't have keys, generate a new one:
    - **Public Key** = Username
    - **Private Key** = Password

2. Check If Marketplace Credentials Are Set

```
composer config --global http-basic.repo.magento.com
```

This will display if credentials are currently configured. If no credentials are set, you will be prompted to enter them during the installation in step 3.

3. Install the Module via Composer

Connect to your server via SSH and navigate to the Magento root directory:

```
cd /path/to/magento/root
```

Use the following Composer command to install the module:

```
composer require magmodules/m2-rich-snippets-suite
```

When prompted, enter your **Public Key** as the username and **Private Key** as the password. Composer will store these credentials for future use.

4. Enable the Module

Run the following commands:

```
php bin/magento module:enable Magmodules_RichSnippets
php bin/magento setup:upgrade
php bin/magento cache:flush
```

If Magento is running in production mode, recompile and deploy static content:

```
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy -f
```

Note: The compilation and deployment steps may take several minutes to complete.

5. Verify Installation

Via Admin Panel:

1. Log in to your **Magento Admin Panel**.
2. Navigate to **Stores → Configuration → Magmodules → Rich Snippet Suite**.
3. Check if the module appears and start the configuration right away!

Via Command Line:

```
php bin/magento module:status | grep Magmodules_RichSnippets
```

The module should appear in the enabled modules list.

For a complete overview of features and configuration options, see the Rich Snippet Suite extension on magmodules.eu
