CLI Commands

Google Sitemap & Robots for Magento 2

Command line tools for the Google Sitemap & Robots extension. These commands are useful for manual sitemap generation, automation scripts, and troubleshooting.

Available Commands

Command	Description
`mm-sitemap:generate`	Generate the XML sitemap

mm-sitemap:generate

Generates the XML sitemap for your store. This is the same process that runs via cron.

```
# Generate sitemaps for all enabled store views
bin/magento mm-sitemap:generate

# Generate sitemap for specific store view only
bin/magento mm-sitemap:generate --store-id=1
```

Options:

Option	Description
`--store-id`	Generate sitemap for this store view only. If omitted, all enabled store views are processed.

Output: Shows progress and results per store view.

Use this when:

- Testing sitemap generation without waiting for cron
- Troubleshooting sitemap issues (CLI provides more detailed output)
- Running sitemap generation from deployment scripts
- Manual sitemap refresh after catalog updates

Examples

Manual sitemap generation after catalog update

```
# Generate fresh sitemap immediately
bin/magento mm-sitemap:generate --store-id=1
```

Generate all sitemaps (deployment script)

```
# After deployment, regenerate all sitemaps
bin/magento cache:flush
bin/magento mm-sitemap:generate
```

Troubleshoot specific store view

```
# Generate with output visible
bin/magento mm-sitemap:generate --store-id=1

# Verify the sitemap file exists
ls -la pub/sitemap*.xml
```

Automated daily generation via system cron

```
# Run at 2 AM daily (alternative to Magento cron)
0 2 * * * cd /var/www/magento && bin/magento mm-sitemap:generate
```
