magmodules

Quick Start Guide

OpenAI Commerce for

Get your OpenAI Commerce feed up and running in minutes. This guide covers the essential configuration to generate your first JSON feed for AI-powered shopping platforms.

Prerequisites

Before you begin:

- Admin access to Magento
- Products with complete data (title, description, images, price)
- Seller information ready (company name, policy pages)
- Cron configured and running in Magento

Step 1: Enable the Module

1. Go to **Magmodules → OpenAI - Feed Configuration → General**
2. Set **Enable** to **Yes**
3. Click **Save Config**

Step 2: Configure Seller Data

1. Go to **Seller Data** section
2. Enter your **Seller Name** (required)
3. Select CMS pages for:
    - **Privacy Policy**
    - **Terms of Service**
    - **Return Policy**
4. Enter your **Return Window** in days
5. Click **Save Config**

Step 3: Configure Feed Generation

1. Go to **Generation** section
2. Set **Enable** to **Yes** for each store view
3. Optionally customize the **Filename** (default works fine)
4. Click **Save Config**

Step 4: Map Your Attributes

Go to **Attributes** section and configure at minimum:

Attribute	Recommended Mapping
ID	SKU
Title	Product Name
Description	Description
GTIN	Your EAN/barcode attribute
Brand	Manufacturer

Step 5: Generate Your First Feed

Option A - Via Admin: Click the **Generate** button in the feed table.

Option B - Via CLI:

```
bin/magento mm-openai:feed:create --store-id=1
```

Step 6: Verify the Feed

1. Click the feed URL in the Generation table
2. Verify the JSON loads correctly
3. Check that products appear with all required data

The feed is now ready to be submitted to OpenAI Commerce or other AI shopping platforms.
