## **Quick Start Guide**

Bol.com Integration for Magento 2

Get [Bol.com Integration](#) up and running in minutes. This guide walks you through the essential setup steps to connect your Magento store with Bol.com and start selling on the Netherlands' largest marketplace.

## Step 1: Enable the Module

---

1. Go to **Magmodules** → **Bol.com** → **Configuration** → **Settings**
2. Set **Enabled** to Yes
3. Click **Save Config**
4. Flush cache: **System** → **Cache Management** → **Flush Magento Cache**

## Step 2: Get Your Bol.com API Credentials

---

Before you can connect, you need API credentials from Bol.com:

1. Log in to your [Bol.com seller account](#)
2. Go to **Settings** → **API Settings**
3. Create new API credentials or use existing ones
4. Copy your **Client ID** and **Client Secret**

## Step 3: Create a Bol.com Account

---

1. Go to **Bol.com** → **Configuration** → **Accounts**
2. Click **Add New Account**
3. Configure the account:

Setting	Description
Enabled	Yes
Name	Internal name (e.g., "Main Account")
Is Demo	No (unless testing with demo credentials)
Client ID	Your Bol.com API Client ID
Client Secret	Your Bol.com API Client Secret

4. Configure **Order Import** settings:
  - Enable order import

- Set **Import Orders From** date
- Select **Store View** for orders
- Choose **Product Identifier** (attribute containing EAN)
- Select shipping methods

5. Click **Save**

## Test the Connection

Run the connection test to verify your credentials:

```
bin/magento magmodules-bol:test-connection
```

## Step 4: Create a Product Profile

Product profiles define which products to sell on Bol.com and how:

1. Go to **Bol.com → Configuration → Product Profiles**
2. Click **Add New Product Profile**
3. Configure:

Setting	Description
Enabled	Yes
Name	Profile name (e.g., "All Products")
Account	Select your Bol.com account
Store View	Store view for product data
EAN Attribute	Attribute containing EAN/barcode

4. Set up **Conditions** to select which products to include
5. Configure **Price Data** (price attribute, markup percentage)
6. Configure **Offer Data** (condition, fulfilment type, delivery code)
7. Click **Save**

## Step 5: Export Your Offers

1. Go to **Bol.com → Data → Offers**

2. Wait for the product profile to process (or run manually)
3. Select the offers you want to export
4. Use mass action **Export** to push offers to Bol.com

Or export via CLI:

```
bin/magento magmodules-bol:export-offers
```

## Step 6: Enable Cron Jobs

---

For automatic synchronization, configure cron jobs at **Magmodules** → **Bol.com** → **Configuration** → **Settings** → **Cron**:

Cron Job	Recommended
Import Orders	Every 15 minutes
Export Shipments	Every 15 minutes
Import Competing Offers	Daily
Process Product Profiles	Every hour

## Verification Checklist

---

- Module is enabled
- Bol.com account is created and connection test passes
- Product profile is created with correct EAN attribute
- Offers appear in the Offers grid
- Offers are successfully exported to Bol.com
- Test order imports correctly

## Common Setup Issues

---

### Connection test fails

- Verify Client ID and Client Secret are correct
- Check if API credentials are active in Bol.com partner portal
- Ensure "Is Demo" matches your credential type

## No products in Offers grid

- Check product profile conditions
- Verify EAN attribute has values
- Run product profile processing manually

## Orders not importing

- Verify order import is enabled on the account
- Check "Import Orders From" date
- Ensure cron is running
