Shipments Grid

Bol.com Integration for Magento 2

The Shipments Grid shows all shipments that need to be or have been exported to Bol.com. When you create a shipment in Magento for a Bol.com order, it appears here for synchronization with the marketplace.

Location: Bol.com → Data → Shipments

Columns

Column	Description
Shipment Uuid	Bol.com shipment identifier (hidden by default)
Bol OrderId	Original Bol.com order ID
Magento OrderId	Magento order increment ID
Magento ShipmentId	Magento shipment increment ID
Error	Error message if export failed
Created At	When the shipment was created
Updated At	Last update timestamp
Status	Export status to Bol.com

How Shipments Enter This Grid

Shipments are automatically tracked when you ship Bol.com orders:

1. A Bol.com order is created in Magento
2. You create a shipment for the order in Magento
3. The shipment appears in this grid with status "Pending"
4. Cron job exports the shipment to Bol.com
5. Status updates to "Exported" on success

Requirements:

- Order must be a Bol.com order
- Shipment must be created in Magento
- Export Shipments cron must be enabled

Status Explained

Status	Meaning
Pending	Shipment created, waiting for export
Exported	Successfully sent to Bol.com
Error	Export failed - check Error column

Manual Export

Shipments are exported automatically via cron. To export immediately:

```
bin/magento magmodules-bol:export-shipments
```

Tips

- Shipments export automatically - no manual action needed normally
- Check **Error** column if shipments stay in Pending status
- Ensure carrier mapping is configured correctly
- Track & Trace information is sent separately (see Track & Trace Grid)
