

Upgrading from v2.x to v3.0

E-boekhouden Connection for Magento 2

New in v3.0

- **REST API** — faster and more reliable, replaces the old SOAP connection
- **Order Accounting Tab** — review and edit invoice/credit memo line items directly from the order page
- **Inline Editing** — adjust amounts, tax codes, ledgers and cost centers before syncing
- **Auto-Import** — ledgers, tax codes and cost centers are imported automatically when saving your token
- Various small improvements and bug fixes

What Changed

- **REST API** replaces SOAP — you need a new API token
- **PHP 8.1** minimum required

Upgrade Steps

1. Log into **e-Boekhouden.nl** → Beheer → Koppelingen → API → e-Boekhouden API
2. Generate a new API token
3. In Magento: **Stores** → **Configuration** → **Accounting** → **e-Boekhouden.nl** → **Connection**
4. Enter the **API Token** and click **Save Config**
5. Ledgers, tax codes and cost centers are imported automatically
6. Verify your mappings are still correct
