

 eKomi

CLI Commands

eKomi Reviews for Magento 2

Command line tools for managing eKomi Reviews. These commands are useful for manual operations, troubleshooting, and automation scripts.

Available Commands

shopreview:ekomi:sync

Synchronize reviews from eKomi for all configured accounts.

```
bin/magento shopreview:ekomi:sync [options]
```

Options:

Option	Description
<code>--all</code>	Sync all historical reviews (full sync)
<code>--date_range=<range></code>	Sync reviews from a specific time period

Date Range Format:

- `1-11m` - 1 to 11 months ago
- `>=1y` - 1 year or more ago

Examples:

```
# Sync recent reviews (default behavior)
bin/magento shopreview:ekomi:sync

# Full sync - all historical reviews
bin/magento shopreview:ekomi:sync --all

# Sync reviews from the last 3 months
bin/magento shopreview:ekomi:sync --date_range=3m

# Sync reviews from the last 6 months
bin/magento shopreview:ekomi:sync --date_range=6m
```

When to use:

- After initial setup to import existing reviews
- When reviews appear missing or out of sync

- To manually trigger a sync outside of cron schedule

shopreview:ekomi:import-new

Import only new reviews since the last sync.

```
bin/magento shopreview:ekomi:import-new
```

Examples:

```
# Import new reviews  
bin/magento shopreview:ekomi:import-new
```

When to use:

- Quick sync of recent reviews
- When you don't need to re-import all historical data
- For incremental updates between full syncs

shopreview:ekomi:selftest

Run diagnostic tests to verify your configuration.

```
bin/magento shopreview:ekomi:selftest
```

Tests performed:

- PHP version compatibility
- Magento version compatibility
- Extension enabled status
- Cron configuration
- API connectivity
- Account credentials validation

Example output:

```
eKomi Reviews Self-Test Results  
=====  
  
[✓] PHP Version: 8.2.0 (OK)  
[✓] Magento Version: 2.4.6 (OK)  
[✓] Extension Status: Enabled
```

```
[✓] Cron Configuration: OK
[✓] API Connection: OK
[✓] Account 12345: Valid credentials
```

All tests passed!

When to use:

- After initial installation
- When troubleshooting issues
- Before contacting support
- As part of regular maintenance checks

Usage Tips

Running in Production

For production environments, consider:

```
# Run with specific memory limit if processing large amounts of data
php -d memory_limit=512M bin/magento shopreview:ekomi:sync --all
```

Automation

These commands can be integrated into deployment scripts or monitoring:

```
# Example: Post-deployment sync
bin/magento setup:upgrade
bin/magento cache:flush
bin/magento shopreview:ekomi:sync
```

Logging

Commands output progress to stdout. For logging:

```
# Save output to log file
bin/magento shopreview:ekomi:sync --all >> var/log/ekomi_manual_sync.log 2>&1
```
