Google Shopping for Magento 2

# Installation using the Adobe Marketplace

---

- 1 Installing a Magento 2 Extension via the Adobe Marketplace

# Installing a Magento 2 Extension via the Adobe Marketplace

---

## Important Note before Installing

If the plugin was purchased from **magmodules.eu**, this installation method **does not apply**. The steps outlined below are **only for orders placed via the Adobe Marketplace**. Additionally, this is the **only supported installation method for Marketplace purchases** other installation methods mentioned in our support section do **not** apply to Marketplace orders.

## 1. Get Access Keys from Magento Marketplace

---

1. Go to [Magento Marketplace](#).
2. Log in with your Magento account.
3. Click on your profile (top-right) → **My Profile**.
4. Navigate to **Access Keys** (under the Marketplace tab).
5. If you don't have keys, generate a new one:
  - **Public Key** = Username
  - **Private Key** = Password

## 2. Check If Marketplace Credentials Are Set

---

```
composer config --global http-basic.repo.magento.com
```

This will display if credentials are currently configured. If no credentials are set, you will be prompted to enter them during the installation in step 3.

## 3. Install the Module via Composer

---

Connect to your server via SSH and navigate to the Magento root directory:

```
cd /path/to/magento/root
```

Use the following Composer command to install the module:

```
composer require magmodules/m2-googleshopping
```

When prompted, enter your **Public Key** as the username and **Private Key** as the password. Composer will store these credentials for future use.

## 4. Enable the Module

---

Run the following commands:

```
php bin/magento module:enable Magmodules_GoogleShopping
php bin/magento setup:upgrade
php bin/magento cache:flush
```

If Magento is running in production mode, recompile and deploy static content:

```
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy -f
```

*Note: The compilation and deployment steps may take several minutes to complete.*

## 5. Verify Installation

---

### Via Admin Panel:

1. Log in to your **Magento Admin Panel**.
2. Navigate to **Stores → Configuration → Magmodules → Google Shopping**.
3. Check if the module appears and start the configuration right away!

### Via Command Line:

```
php bin/magento module:status | grep Magmodules_GoogleShopping
```

The module should appear in the enabled modules list.

For a complete overview of features and configuration options, see the Google Shopping extension on [magmodules.eu](https://magmodules.eu)
