magmodules

Quick Start Guide

KatanaPIM for Magento 2

Get your KatanaPIM Connect extension connected and run your first synchronization.

Prerequisites

Before starting, ensure you have:

- Module installed and enabled
- Admin access to Magento
- KatanaPIM account with API credentials (URL and API Key)
- Working Magento cron (for automated sync)

Step 1: Enable the Module

1. Go to **Katana PIM → Configuration** (or Stores → Configuration → Katana PIM → General)
2. In the **General** section, set **Enabled** to **Yes**
3. Click **Save Config**

Step 2: Connect to KatanaPIM API

1. Navigate to the **API** section
2. Enter your **URL** (your KatanaPIM instance URL)
3. Enter your **API Key** (from your KatanaPIM account)
4. Click **Test Credentials** to verify the connection
5. Click **Save Config**

Step 3: Configure Store Language Mapping

1. Go to **Store Languages** section
2. Map your KatanaPIM language codes to Magento store views
3. Use `default` (lowercase) to map KatanaPIM's default language
4. Click **Save Config**

Finding your language codes: In KatanaPIM, go to **Configuration > Languages** to see all available languages and their codes (e.g., `nl-NL`, `en-US`, `fr-FR`).

Example mapping:

Katana Language Code	Store View
default	English
nl-NL	Dutch
de-DE	German

Step 4: Import Attributes First

Before importing products, you need to import and map attributes:

1. Go to **Katana PIM → Attributes**
2. Click **Import Attributes** button
3. Wait for import to complete
4. For each attribute, use inline edit to:
   - Select the **Magento Attribute Code** to map to
   - Set **Is Configurable** to Yes for variant attributes
5. Mark unwanted attributes as **Skipped**

Step 5: Import Categories (Optional)

If you want to import categories from PIM:

1. Go to **Katana PIM → Product Data** in configuration
2. Enable **Category Import** if desired
3. Go to **Katana PIM → Categories**
4. Click **Import Categories** button
5. Select categories and use **Update/Create Magento Category** mass action

Step 6: Run Your First Product Sync

Option A - Via Admin:

1. Go to **Katana PIM → Products**
2. Click **Full Sync** button
3. Wait for products to import
4. Select products and use **Update/Create Magento Products** mass action

Option B - Via CLI:

```
# Import everything (attributes, categories, products, assets)
bin/magento katana:import:full

# Import only products
bin/magento katana:import:full --products
```

Step 7: Enable Automation (Optional)

1. Go to **Katana PIM → Automation** in configuration
2. Set **Enable Automation** to **Yes**
3. Configure:
   - **Auto create new products** - Yes/No
   - **Auto create new categories** - Yes/No
   - **Full Update** frequency (e.g., daily)
   - **Incremental Update** frequency (e.g., every 4 hours)
4. Click **Save Config**

Verify Your Setup

1. Check **Katana PIM → Products** grid for imported products
2. Verify products in **Catalog → Products** with correct data
3. Check **Katana PIM → Sync Log** for any errors

Next Steps

- Configure Attribute Mapping for all product data fields
- Review the full Configuration Reference
- Understand the Sync Process for Full vs Incremental updates
