

## CLI Commands

OpenAI Commerce for

Command line tools for the [OpenAI Commerce](#) extension. These commands are useful for manual feed generation, automation scripts, and troubleshooting.

## Available Commands

Command	Description
<code>mm-openai:feed:create</code>	Generate the OpenAI Commerce feed
<code>mm-openai:feed:cleanup</code>	Remove old feed files

### mm-openai:feed:create

Generates the OpenAI Commerce JSON feed. This is the same feed that runs via cron.

```
# Generate feeds for all enabled store views
bin/magento mm-openai:feed:create

# Generate feed for specific store view only
bin/magento mm-openai:feed:create --store-id=1
```

#### Options:

Option	Description
<code>--store-id</code>	Generate feed for this store view only. If omitted, all enabled store views are processed.

**Output:** Shows progress and the number of products exported per store view.

#### Use this when:

- Testing feed generation without waiting for cron
- Troubleshooting feed issues (CLI provides more detailed output)
- Running feed generation from deployment scripts
- Manual feed refresh after catalog updates

### mm-openai:feed:cleanup

Removes old feed files from the feed directory. Useful for cleaning up storage.

```
bin/magento mm-openai:feed:cleanup
```

### Use this when:

- Disk space is running low
- You want to remove outdated feed files
- After changing feed filenames

## Examples

---

### Manual feed generation after catalog update

```
# Generate fresh feed immediately  
bin/magento mm-openai:feed:create --store-id=1
```

### Generate all feeds (deployment script)

```
# After deployment, regenerate all feeds  
bin/magento cache:flush  
bin/magento mm-openai:feed:create
```

### Troubleshoot specific store view

```
# Generate with output visible  
bin/magento mm-openai:feed:create --store-id=1  
  
# Check the generated feed  
cat var/export/openai/openai_1.json | head -100
```
