

## CLI Commands

Shopreviews for Magento 2

Command line tools for the [Shopreview](#) extension.

## Available Commands

---

Command	Description
<code>shopreview:selftest</code>	Run diagnostic tests on the extension

## Selftest

---

Performs automated diagnostic tests to verify the extension is properly configured and functioning.

### Usage

```
bin/magento shopreview:selftest
```

### What It Tests

The selftest checks:

- Extension enabled status
- Database table integrity
- Required configuration settings
- Module dependencies

### Example Output

```
Extension Enabled: success
  - Extension is enabled

Database Tables: success
  - All required tables exist

Configuration: success
  - Configuration is valid
```

### Interpreting Results

#### Success:

```
test_name: success
  - Description of what passed
```

#### **Error:**

```
test_name: error
  - Description of what failed
```

## **When to Run**

Run selftest:

- After initial installation
- After Magento upgrades
- When troubleshooting issues
- After database migrations

## **Useful Magento Commands**

---

While not specific to Shopreview, these commands are helpful:

### **Cache Management**

```
# Clear all cache
bin/magento cache:flush

# Clear specific cache types
bin/magento cache:clean config full_page

# Check cache status
bin/magento cache:status
```

### **Reindex**

```
# Reindex all
bin/magento indexer:reindex

# Check indexer status
bin/magento indexer:status
```

## Setup

```
# Run upgrades after module updates
bin/magento setup:upgrade

# Compile DI
bin/magento setup:di:compile

# Deploy static content
bin/magento setup:static-content:deploy
```

## Automation

---

### Cron-based Tasks

The extension uses Magento's cron system for scheduled tasks. Ensure cron is properly configured:

```
# Verify cron is running
bin/magento cron:run
```

### Integration with CI/CD

Include selftest in deployment pipelines:

```
# Example deployment step
bin/magento setup:upgrade
bin/magento cache:flush
bin/magento shopreview:selftest
```

This catches configuration issues early in the deployment process.
