

Configuration

Shopreviews for Magento 2

Complete configuration reference for the [Shopreview](#) extension. All settings are found under **Stores** → **Configuration** → **Magmodules** → **Shopreview**.

General

Basic extension settings.

Setting	Description
Enabled	Enable or disable the extension

Notification Settings

Configure email notifications for new reviews.

Setting	Description
Notification on New Reviews	Enable to receive email when a new review is submitted
Email Theme	Select the email template for notifications
Send Notification to	Select which store contact receives notifications
Send a BCC to	Additional email address to receive a copy (optional)

Setting Up Notifications

1. Set **Notification on New Reviews** to **Yes**
2. Select an **Email Theme** from available templates
3. Choose the **Send Notification to** contact (e.g., General Contact, Sales)
4. Optionally add a **BCC** email address for additional recipients

Form Settings

Configure form security.

Setting	Description
Add Google reCAPTCHA	Enable Google reCAPTCHA v2 ("I am not a robot") on forms

Enabling reCAPTCHA

1. First configure reCAPTCHA in **Stores** → **Configuration** → **Security** → **Google reCAPTCHA Storefront**
2. Enable the reCAPTCHA v2 "I am not a robot" type
3. Return to Shopreview settings
4. Set **Add Google reCAPTCHA** to **Yes**

Note: Only reCAPTCHA v2 "I am not a robot" checkbox type is supported.

Frontend

Control how reviews display and behave on the storefront.

Setting	Description
Reviews Per Page	Number of reviews per page (5-100)
Default Sorting	How reviews are sorted by default
Allow Guests to Write Reviews	Allow non-logged-in visitors to submit reviews
Auto Approve Reviews	Automatically approve reviews without moderation
Success Message After Review Saved	Custom message shown after successful submission

Pagination

Set **Reviews Per Page** between 5 and 100. This enables pagination on the review listing page.

Guest Reviews

When **Allow Guests to Write Reviews** is enabled:

- Visitors don't need to log in to submit reviews
- Consider enabling reCAPTCHA to prevent spam
- Email field should be included in your form for follow-up

Auto-Approve

When **Auto Approve Reviews** is enabled:

- Reviews are immediately visible on the frontend
- No manual moderation required
- Consider this carefully for spam prevention

When disabled:

- Reviews go to pending status
- Must be manually approved in **Marketing** → **Shopreview** → **Reviews**
- Provides quality control

Success Message

Customize the message displayed after successful review submission. Leave empty for the default message.

Debug

Development and troubleshooting settings.

Setting	Description
Debug Logging	Enable detailed logging for troubleshooting

Enable debug logging only when troubleshooting issues. Disable in production to prevent log file growth.

Configuration Workflow

Initial Setup

1. Enable the extension
2. Configure frontend settings:
 - Set reviews per page
 - Decide on guest reviews
 - Choose auto-approve behavior
3. Set up notifications if needed
4. Enable reCAPTCHA for spam protection

Recommended Settings

For High-Traffic Stores:

- Disable auto-approve to moderate reviews
- Enable reCAPTCHA
- Set up notifications

For Smaller Stores:

- Enable auto-approve for immediate display
- Enable guest reviews for more submissions
- Consider reCAPTCHA if spam becomes an issue

Best Practices

Spam Prevention

- Enable reCAPTCHA for all forms
- Consider disabling guest reviews if spam is excessive
- Use auto-approve only with reCAPTCHA enabled

Review Quality

- Disable auto-approve for curated reviews
- Set up notifications to respond quickly to new reviews
- Review and respond to customer feedback regularly

Performance

- Keep reviews per page reasonable (10-20)
- Disable debug logging in production
