magmodules

Quick Start Guide

Shopreviews for Magento 2

Get your Shopreview extension up and running quickly. This guide covers the essential steps to start collecting store reviews.

Prerequisites

Before you begin, ensure you have:

- Magento 2.4.4 or higher
- PHP 7.4 or higher
- Admin access to your Magento store

Step 1: Enable the Extension

1. Go to **Stores** → **Configuration** → **Magmodules** → **Shopreview**
2. In the **General** section, set **Enabled** to **Yes**
3. Click **Save Config**
4. Clear cache: **System** → **Cache Management** → **Flush Magento Cache**

Step 2: Create Your First Review Form

1. Go to **Marketing** → **Shopreview** → **Review Forms**
2. Click **Add New**
3. Fill in the basic settings:
    - **Page Title**: Name for your review page
    - **URL Key**: URL path for the review page (e.g., `store-reviews`)
    - **Store View**: Select which stores can access this form
4. Add form fields using the field builder
5. Click **Save**

Step 3: Configure Frontend Settings

1. Go to **Stores** → **Configuration** → **Magmodules** → **Shopreview**
2. In the **Frontend** section:
    - **Reviews Per Page**: Set pagination (5-100)
    - **Default Sorting**: Choose how reviews are sorted

- **Allow Guests to Write Reviews**: Enable for non-logged-in visitors
- **Auto Approve Reviews**: Enable to skip moderation

3. Click **Save Config**

Step 4: Add Widget (Optional)

1. Go to **Content → Widgets → Add Widget**
2. Select **Type**: Shopreview
3. Configure widget settings:
   - **Sidebar Title**: Widget header text
   - **Review Form**: Select your form
   - **Display Summary of Average Score**: Show overall rating
   - **Display Average Score in Stars**: Visual star rating
   - **Display Reviews**: Show individual reviews
4. Set widget placement in **Layout Updates**
5. Click **Save**

Step 5: Test Your Setup

1. Visit your review page at: `yourstore.com/[url-key]`
2. Submit a test review
3. Check the review in **Marketing → Shopreview → Reviews**
4. Approve the review if auto-approve is disabled
5. Verify the review displays on the frontend

Verification Checklist

After setup, verify:

- Extension is enabled in configuration
- At least one review form exists
- Form is assigned to correct store view
- Review page is accessible on frontend
- Widget displays correctly (if configured)

What's Next?

- Configuration - Explore all settings
- Review Forms - Advanced form builder options
- Widgets - Widget customization
